Help Center For courses in Physiological Psychology and BiopsychologyAn up-to-date, comprehensive, and accessible overview of behavioral neuroscienceRevel® Physiology of Behavior provides a scholarly yet accessible portrait of the dynamic interaction between biology and behavior. Authors Neil Carlson and Melissa Birkett drew upon their experience teaching and working with students to create this comprehensive and accessible guide for students of behavioral neuroscience. In addition to inclusion of the latest research in the field, the 13th Edition offers a new chapter on development of the nervous system that features information about disorders of development, autism spectrum disorders, and attention-deficit/hyperactivity disorder. Revel is Pearson's newest way of delivering our respected content. Fully digital and highly engaging, Revel replaces the textbook and gives students everything they need for the course. Informed by extensive research on how people read, think, and learn, Revel is an interactive learning environment that enables students to read, practice, and study in one continuous experience — for less than the cost of a traditional textbook.Learn more about Revel. New and updated material keeps the text current and engaging NEW - Freshly developed for the 13th Edition, Chapter 15: Disorders of the Developing Nervous System combines information about development of the nervous system with information about disorders of development, autism spectrum disorders, and attention deficit/hyperactivity disorder.UPDATED - The art throughout the 13th Edition has been updated to improve accessibility, as well as to keep up with the latest findings and studies in the field. UPDATED - Additional headings and subheadings in many chapters, as well as more concise learning objectives, help readers more easily identify main themes and concepts.UPDATED - The 13th Edition has been thoroughly revised to reflect the latest research and the current state of the discipline. Key updates include:research on adult neurogenesis in Chapter 1information about CRISPR techniques in Chapter 5coverage of dyspraxia in Chapter 8research on lucid dreaming in Chapter 9research on changes across the menstrual cycle in Chapter 10research on heredity and aggression in Chapter 11information about new treatments for binge eating in Chapter 12research on tip of the tongue phenomenon in Chapter 14research on possible treatments for Huntingtons disease in Chapter 16research on the role of the hippocampus in chronic pain in Chapter 18research on epigenetic factors related to cocaine abuse in Chapter 19 Student-focused features guide readers through text and highlight key concepts A case study at the beginning of each chapter describes the experiences of people whose lives are impacted by an important issue in neuroscience. Additional case studies are included elsewhere in the body of many chapters. Learning objectives at the beginning of each major section of the text help students identify and understand the key points from each section. The learning objectives are revisited in summaries at the end of each section.Thought questions at the end of each section encourage students to think deeply about what theyve learned. Chapter Review questions conclude each chapter, providing a useful review and a more comprehensive opportunity for students to test their understanding. Critical Concepts features in each chapter highlight important topics in neuroscience, and provide opportunities for students to explore them in greater depth. Dynamic content designed for the way today's students read, think, and learn brings concepts to life Videos and interactives integrated directly into the author-created narrative keep students engaged as they read through each chapter. Thanks to this media-rich presentation of content, students are more likely to complete their assigned reading and retain what theyve read.NEW - Twenty five new videos on a range of topics help students understand the complexities of behavioral neuroscience. Video topics include:How Does CRISPR Work?Neuroscience of Anxiety DisordersNeuroscience of DepressionThe EyeWhat Are Optogenetics?Embedded assessments such as quizzes and concept checks afford students opportunities to check their understanding at regular intervals before moving on. Assessments in Revel let instructors gauge student comprehension frequently, provide timely feedback, and address learning gaps along the way.The Revel® mobile app lets students read, practice, and study anywhere, anytime, on any device. Content is available both online and offline, and the app syncs work across all registered devices automatically, giving students great flexibility to toggle between phone, tablet, and laptop as they move through their day. The app also lets students set assignment notifications to stay on top of all due dates.The Revel audio playlist lets students listen and learn as they go. NEW - Voice-activated technology gives students the power to listen on Amazon Alexa-enabled or Google Assistant-enabled devices using simple voice commands.The writing functionality in Revel enables educators to integrate writing among the best ways to foster and assess critical thinking into the course without significantly impacting their grading burden. Self-paced Journaling Prompts throughout the narrative encourage students to express their thoughts without breaking stride in their reading. Assignable Shared Writing Activities direct students to share written responses with classmates, fostering peer discussion. Essays integrated directly within Revel allow instructors to assign the precise writing tasks they need for the course.Highlighting, note taking, and a glossary let students read and study however they like. Educators can add notes for students, too, including reminders or study tips. Superior assignability, tracking, and pedagogical tools help educators make sure students are completing their reading and understanding core concepts The assignment calendar allows educators to indicate precisely which readings must be completed on which dates. This clear, detailed schedule helps students stay on task by eliminating any ambiguity as to which material will be covered during each class. When they understand exactly what is expected of them, students are better motivated to keep up.The performance dashboard empowers educators to monitor class assignment completion as well as individual student achievement. Actionable information, such as points earned on quizzes and tests and time on task, helps educators intersect with their students in meaningful ways. For example, the trending column reveals whether students' grades are improving or declining, helping educators to identify students who might need help to stay on track.LMS integration provides institutions, instructors, and students easy access to their Revel courses via Blackboard Learn, Canvas, Brightspace by D2L, and Moodle. With single sign-on, students can be ready to access an interactive blend of authors' narrative, media, and assessment on their first day. Flexible, on-demand grade synchronization capabilities allow educators to control exactly which grades should be transferred to their LMS Gradebook. Revel is built for digital learning, but we've got you covered if you need print, too Revel gives students everything they need in an integrated digital learning environment. But if students need a loose-leaf print reference to complement their Revel experience, they can purchase one from within their Revel course at any time.
